// profile

Product Designer with **3+ years in fintech** — research, UX, UI, design systems. I work end-to-end and write the React that ships the work, which means faster prototypes, calmer engineering handoffs, and design decisions that survive contact with production. Based in Asia, working flexibly across US, EU and Asia time zones.

// experience

Product Designer

2023 — 2026

Access Softek, Inc. · US fintech — white-label digital banking platform for credit unions

- Translated UI/UX designs into front-end-ready specifications and supported implementation.
- Worked with developers to ensure accurate implementation of layouts and styles.
- Reviewed UI using DevTools and identified inconsistencies and bugs.
- End-to-end product design: research, user flows, wireframes, prototyping, and final UI design.
- Designing and improving web interfaces, dashboards, and complex product features.
- Definition and refinement of user experience in collaboration with product managers, developers, and stakeholders.
- Translation of business requirements into clear, user-centered design solutions.
- Analysis and improvement of existing interfaces based on usability principles and product goals.
- Contribution to and adherence to design systems to ensure consistency across products.
- Close collaboration with engineering teams to support implementation and maintain design quality.
- Validation of UI implementation using DevTools (layout, styles, responsiveness).
- Participation in product discussions, contributing to UX strategy and feature definition.

Product Designer · contract

2021 — 2022

Large-scale travel product · web, iOS, Android

- Contributed to a multi-platform design system; ran iterative redesigns of search, checkout and profile flows alongside PMs and engineers.
- Generated and tested design hypotheses with cross-functional teams across three platforms.

Freelance Product Designer

2022 — present

Early-stage clients · brand & web · EU/US

- End-to-end design for client projects — discovery through final UI delivery — plus brand identity systems with usable component libraries.

// selected project

Personal portfolio site — designed and coded solo in React, TypeScript and SCSS Modules; deployed on Vercel. A working demonstration of "designer who codes".
